PARTH PUSADKAR

Computer Science Undergraduate | AI/ML Enthusiast

parthpusadkar1312@gmail.com | linkedin.com/in/parthpusadkar/ | github.com/gotr0oted | Nagpur, India

PROFESSIONAL SUMMARY

Computer Science undergraduate specialising in AI/ML and Data Analytics with hands-on experience building end-to-end ML pipelines, NLP systems, and predictive models. Proficient in Python, SQL, and modern ML frameworks. Exploring applications in financial data and generative AI. Seeking an internship in AI/ML, Data Science, or Software Engineering to deliver measurable impact.

EDUCATION

B.Tech in Computer Science & Engineering (AI/ML) *2024 – 2028*

Symbiosis Institute of Technology, Nagpur

Relevant Coursework: Data Structures & Algorithms, DBMS, Artificial Intelligence, ML Fundamentals, Probability & Statistics

PROJECTS

Stock Price Prediction Using Machine Learning · *Kodbud (Remote) – AI Internship* *Mar 2026*

- Built a regression model to forecast stock prices from historical market data; designed the full data pipeline including ingestion, preprocessing, normalisation, and trend visualisation using Matplotlib and Seaborn.
- Applied feature engineering (lag features, rolling averages) to capture temporal patterns; implemented end-to-end in Python (Pandas, NumPy, Scikit-learn) with reproducible, version-controlled code on GitHub.

AI-Based Earthquake Disaster Management System · *Academic Project* *Oct 2025*

- Engineered an ML-powered early-warning system using seismic data classification (Random Forest, SVM) to predict earthquake magnitude and affected zones, improving simulated response time by 30%.
- Performed geospatial feature engineering on sensor data and prepared a technical report on AI applications in disaster risk reduction.

Twitter Influencer Ranking & Engagement Analytics Engine · *Academic Project* *Aug 2025*

- Developed a weighted scoring algorithm ranking 100+ Twitter accounts by multi-dimensional engagement metrics (likes, retweets, reply rate, follower growth) via the Twitter API and Pandas.
- Automated the full data ingestion-to-leaderboard pipeline, eliminating 90% of manual effort and enabling real-time performance benchmarking with scheduled data refreshes.

TECHNICAL SKILLS

Languages: Python, SQL, HTML/CSS

ML & Data Science: Scikit-learn, Pandas, NumPy, PyTorch (beginner), Regression & Classification, Clustering, Feature Engineering, Model Evaluation & Tuning

NLP & Generative AI: Sentiment Analysis, Text Preprocessing, Hugging Face Transformers (beginner), Prompt Engineering

Data & Visualisation: EDA, Data Cleaning, Matplotlib, Seaborn, Statistical Analysis, REST APIs

Tools & Platforms: Jupyter Notebook, Google Colab, Git/GitHub, MySQL, VS Code, Streamlit (beginner)

CERTIFICATIONS

Deloitte Australia Data Analytics Job Simulation – Forage / Coursera *2024*

Red Hat Python Programming Certification *2024*

LANGUAGES & INTERESTS

Languages: English (Professional Proficiency) · Hindi (Professional Proficiency)

Interests: LLM Applications · Computer Vision · FinTech · AI Ethics · MLOps · Open-Source Development
